Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 5-7 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese Patent 61-153701.

The Japanese Patent shows a bounce preventing member 6 in a table packing apparatus. The bounce preventing member is provided in a position opposing tablet outlets 16. Given that the outlets 16 are arranged at an angle it can be considered that the bounce preventing member 16 is arranged at an oblique angle relative to the outlets.

Re claim 5, the member 16 may be detached.

Re claim 6, the member 16 extends from a vicinity of an upper outlet to a position apart from a lower outlet 16.

Re claim 7, the lower portion of member 6 is vertical.

Re claim 11, as per claim 11 rejection.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese Patent 61-153701 in view of Kim (U.S. Patent 6,202,385).

The Japanese Patent does not show the bounce preventing member as being a flexible plate. However, shown by Kim is the use of a flexible plate 50 (see Figure 4) to cushion tablets. To use a flexible plate instead of a cloth would have been obvious to one of ordinary skill in the art as a plate might remain in its intended position better.

Claims 3, 4, 8-10 and 12-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
